June 2023

Rainhouse Receives \$750,000 Grant from CICE

On June 8, 2023, Rainhouse Manufacturing Canada Ltd. was selected as a funding recipient from the B.C. Centre for Innovation and Clean Energy (CICE)'s 2023 Open Call for Innovation. We are proud to receive a \$750K grant from CICE, which will support our Battery Energy Storage System (BESS) project.

This grant will enable us to advance our demonstration of an innovative energy storage solution that tackles a crucial challenge faced by remote communities: intermittent access to affordable energy.

CICE

**B.C. CENTRE
FOR INNOVATION
& CLEAN ENERGY**

We extend our heartfelt thanks to CICE for their support and recognition of our efforts. Rainhouse is honoured to be part of the clean energy movement and excited about the positive impact we can create together.

"With CICE's support, we will mature our technology and unique business model for full commercial deployment and ready it for scale-up. Our mission is to make Canada self-reliant in meeting our climate mandate and become a sizeable player in this emerging market."

- RAY BROUGHAM,
CEO and founder of Rainhouse
Manufacturing Canada Ltd.
