

MANUFACTURING PLANNER

Responsibilities

- To provide a process for ensuring the product is planned according to customer specifications and organization requirements.
- The Manufacturing Planner must determine the following as appropriate for the planning of product realization:
 - Quality objectives and requirements for the product
 - The need to establish processes and documents, and to provide resources specific to the product.
 - Required verification, validation, monitoring, measurement, inspection and test activities specific to the product and the criteria for product acceptance.
 - Records needed to provide evidence that the realization process and resulting product meet requirements (such as operation sign-offs, 1st article inspections, IPC, Incoming inspection, etc.).
 - Configuration management appropriate to the product
 - Resources to support the use and maintenance of the product.
- File management and document control.
- Provide support to purchasing in selection qualification and monitoring of vendors.
- Support design engineers in producing accurate 3D models in SolidWorks or Fusion 360.
- Support design engineers in producing fully dimensioned and toleranced manufacturing drawings.
- Support design engineers producing 3D models of reverse-engineered parts from 3D CMM scan data.
- Support production staff in assembly processes.
- Proactively contribute to and implement continuous improvement activities.
- Other tasks as required.

Education

- Bachelor's Degree (Preferred)

Skills and Qualifications

- 3+ years experience with product manufacturing and design.
- Experience with SolidWorks or Fusion 360.
- Ability to drive problems to resolution.
- Ability to use hand tools for production, assembly, or measurement.
- Understanding of GD&T.
- Ability to multitask in a fast-paced environment.
- Experience with ISO 9001 is an asset.
