Supporting Local Talent: Rainhouse Sponsors FIX IT 3491 at the Sidney Breakfast Club

FIX IT 3491, founded in 2009, is part of the FIRST Robotics Competition—an inspiring global initiative designed to motivate young people to pursue careers in Science, Technology, Engineering, and Mathematics (STEM).

Often described as "the ultimate sport for the mind," FIRST Robotics challenges teams to design, build, and program robots for high-stakes tournaments. Over the years, FIX IT 3491 has proudly represented Victoria on the world stage, participating in competitions in China, Australia, and the prestigious FIRST Championships in St. Louis and Houston. Recently, they earned both the **Innovation Award** and the **People's Choice Award** at the 2024 Engineering Showcase, co-hosted by Rainhouse Manufacturing Canada Ltd. and the University of Victoria.
