Our Commitment

Rainhouse is a trusted provider in the Canadian manufacturing industry, driving innovation with an steadfast commitment to quality, precision, and customer satisfaction. With a versatile manufacturing division, we offer a comprehensive suite of services tailored to your needs. At Rainhouse, we turn ideas into reality with an unmatched blend of creativity and quality. From Idea to Done, we're with you every step of the way.

Whether you're looking for a full turnkey, consignment, or transactional service, we're here to help.

CNC Capabilities: Up to 8-Axis Turning, 5-Axis Milling, and 5-Axis Coordinate Measuring

Babcock Canada and Babcock International

"Babcock Canada has a close working relationship with Rainhouse. We have found them to be an innovative, reliable and cost-effective supplier. Rainhouse has consistently delivered quality goods not only on time, but often early – saving us time and concomitantly money."

Thales Canada

"I was pleasantly surprised to learn of Rainhouse's expertise and capabilities. They were able to troubleshoot and repair some defence countermeasures components that are fitted onboard a Naval vessel. The cost was very reasonable and the turn around time was great. The customer service is top-notch. I'll definitely be looking to get more support from this service provider."

Thyssenkrupp Marine Systems Canada Ltd.

"I would like to thank you so much for the fixture. The fixture worked incredibly well, it was designed to perfection. Magellan and the German Engineers were amazed at what you were able to design and build in such a short period of time."

Approved First Level Manufacturer in Accordance with DEF Stan 02-862: Naval Fasteners

Rainhouse has been supplying machined components and First Level fasteners for the Victoria In-Service Support Contract (VISSC) for the Royal Canadian Navy's fleet of Victoria Class Submarines for over 10 years.

First Level Process

Material Traceability

Material Traceability Certifications (MTCs) are included with all CNC machined parts by default.

3rd Party Materials Testing

Chemical, mechanical testing, and non-destructive testing (NDT).

CNC Machining

Our expertise spans across a wide range of metals.

3rd Party Part Testing

Non-destructive testing (NDT).

Internal Testing

Every batch of parts goes through a rigorous inspection process and receives a Certificate of Conformance (CoC) report confirming the parts meet the customer's requirements. Including shelf life information when it's needed.

Coating

Types of coatings:
Alodine, Zinc with Anodizing,
FluoroKote, etc.

Shipping

Fast, secure shipping that's on-time and on budget.

Rainhouse Certifications

Rainhouse is committed to the highest standards of quality and compliance.
