A Look Back at Our Open House

On September 12, Rainhouse opened its doors to celebrate 24 years in business. We were excited to welcome clients, partners, students, faculty, friends, and family for an afternoon of tours, conversations, and connection.

Looking Ahead

With the Open House behind us, we are already looking forward to our next big event. The Rainhouse Engineering Showcase will return on April 2, 2026, bringing students and industry together once again to highlight creativity, technical skill, and collaboration. More details to come in the new year.

Thank you for being part of our 24-year journey. We look forward to what's next.

Throughout the day, guests were invited to take guided tours through our facility to see Rainhouse in action. From CNC machining and quality assurance to electronics manufacturing, design, and assembly, visitors explored real parts and equipment while hearing directly from the team.

We were especially happy to welcome students and faculty from Camosun College and the University of Victoria. For many, it was their first opportunity to see how their classroom experience connects to real-world work. For others, it was a chance to reconnect and see how Rainhouse has evolved over time.

Thank you to everyone who attended and to the Rainhouse team for helping to prepare, host, and share your work. The energy in the building was a great reminder of the community behind the work we do.
