

A Year of Growth and Connection

2025 was a year of momentum and milestones at Rainhouse. As we wrap up the year, we're taking a moment to reflect on the progress we've made and the people and partnerships that helped us get there. We expanded our capabilities, strengthened our certifications, and deepened our involvement in the community. Our team remained focused on delivering quality and innovation across every project, and we continued to build partnerships that help shape the future of advanced manufacturing on Vancouver Island.

Strengthening Canadian Manufacturing

In early 2025, Rainhouse reaffirmed its commitment to supporting Canadian-made products and strengthening our domestic economy. That vision took a new step forward with the co-founding of the Vancouver Island Manufacturing Excellence Alliance (VIMEA), an initiative launched by our President, Ray Brougham, to unite local manufacturers and help grow the sector on Vancouver Island. By encouraging collaboration and investing in Canadian innovation, we aim to help build a more resilient and future-ready manufacturing industry close to home.

AS9100D Certification

In January, Rainhouse received its AS9100D certification, a major milestone that allows us to manufacture aerospace parts to globally recognized standards. This certification strengthens our commitment to quality, reinforces our reliability as a supplier, and opens new opportunities within the aerospace sector.
