

## Upgrading with the Datron M8Cube

This summer, we added the Datron M8Cube to our shop floor. This high-speed, 4-axis milling machine expands our ability to handle complex parts with improved precision and faster turnaround times. It is part of our continued investment in advanced technology to better support the industries we serve.

## Looking Ahead

As we close out the year, we're grateful to our team, clients, and collaborators for making 2025 a success. From local partnerships to national events, each step forward was possible because of the people around us. We are excited to carry that momentum into 2026, with more innovation, connection, and shared success to come.

## Rainhouse Open House

In September, we celebrated 24 years in business by opening our doors to the community. Our Open House welcomed clients, local partners, students, and supporters for guided tours, light refreshments, and an inside look at the work we do. Thank you to everyone who joined us.

*“It was amazing to see all the equipment and projects up close. You don't realize how much is happening at Rainhouse until you walk through the shop.”*
