Inspiring Future Engineers on Vancouver Island

At Rainhouse Manufacturing Canada Ltd., we believe collaboration is essential. For 24 years, we have worked to build meaningful connections between education and industry because we know that investing in the next generation of STEM talent helps strengthen the future of manufacturing and technology on Vancouver Island.

This October, we welcomed a group of students from **Esquimalt High School** for a guided tour of our facility. The visit gave them a chance to explore the spaces, tools, and people behind the work we do, from CNC machining and electronic manufacturing services to product design and final assembly. At each stop, students asked thoughtful
