## 2025 Marketplace Mixer Recap

Earlier this month, Rainhouse Manufacturing Canada Ltd. participated as an exhibitor at the 2025 Marketplace Mixer hosted by the Greater Victoria Chamber of Commerce. Held at the Crystal Garden on November 18th, the event brought together dozens of local businesses and organizations for an evening of connection and collaboration.

At our booth, we had the opportunity to introduce Rainhouse to new faces, reconnect with familiar ones, and showcase what we do, from advanced CNC machining to electronic manufacturing services, design, and full-service assembly. We're proud to be part of Vancouver Island's growing business community, and events like this remind us how valuable face-to-face conversations can be.

Events like this highlight what makes Vancouver Island's business community special. They give us a chance to share our work, learn from others, and build meaningful relationships that strengthen both our industry and our region.

Thank you to the Greater Victoria Chamber of Commerce for hosting a fantastic event, and to everyone who visited our booth. We're always happy to connect, share our work, and explore new ways to collaborate. If you missed us at the Marketplace Mixer but want to learn more about Rainhouse, feel free to reach out, we'd love to hear from you.
