Supporting the Next Generation of STEM

At Rainhouse, we believe in building a stronger future for Vancouver Island's manufacturing sector and that starts with investing in the next generation of Science, Technology, Engineering, and Math (STEM) students. By supporting events that connect students with industry, we help bridge the gap between education and real-world experience.

On Monday, January 26, 2026 Rainhouse Manufacturing Canada Ltd. attended Camosun College's Mechanical Engineering Career Development Networking Event. Designed to prepare students for co-op and career exploration, this event gave students a chance to meet professionals from local companies and ask questions about roles, industries, and career paths. Bryanne Kitagawa (Marketing Coordinator) and Alec MacMillan (Mechanical Design Lead) represented Rainhouse at the event, sharing insight into our day-to-day operations, technical capabilities, and the value of cross-functional collaboration in advanced manufacturing.

“It was great to connect with students and answer their questions. They were curious, engaged, and asked thoughtful questions about what it's like to work in the field.”

-Bryanne Kitagawa
