

This event is just one of many ways Rainhouse supports youth in STEM and promotes hands-on learning beyond the classroom. That same spirit of connection drives our upcoming Engineering Design Showcase, co-hosted with the University of Victoria.

This free public event brings together student teams from the University of Victoria, Camosun College, and South Island high schools to showcase hands-on projects in STEM. Attendees will have the opportunity to explore with interactive exhibits, meet the students behind the work, and connect with local industry leaders who support the development of future engineers and innovators. Camosun College will be attending again this year, with a Co-op and Career Lab, student capstone project, and a Robotics team. Together, these groups will help make the 2026 Showcase our biggest and most collaborative yet.

If you're interested in supporting the event, sponsorship opportunities are available until February 15. It's a great way to support STEM education, strengthen industry connections, and inspire the next wave of local talent.

2026 Engineering Design Showcase

Date: Thursday, April 2, 2026

Time: 12:00 PM to 5:00 PM

Location: Pearkes Rec Centre
3100 Tillicum Road, Victoria, BC
