Since 2001, Rainhouse has provided innovative and integrated manufacturing solutions by modifying existing products or assisting with full-scale production for a wide range of key industries.

CAPABILITIES THAT SET US APART

DESIGN SERVICES

CNC MACHINING SERVICES

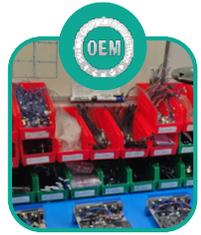

ELECTRONIC MANUFACTURING SERVICES

PROCUREMENT SERVICES

CONTRACT MANUFACTURING SERVICES

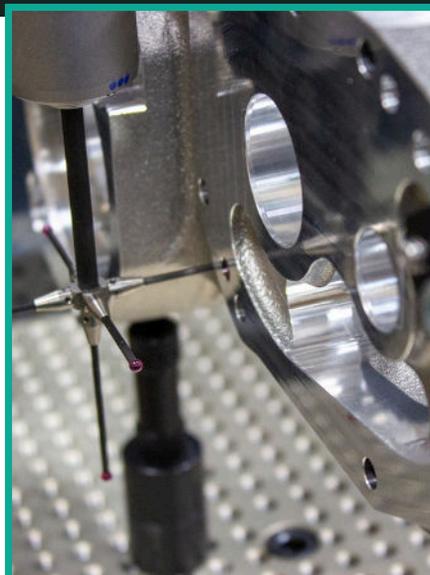

OEM MANUFACTURING SERVICES

- **Design & Development:** Solidworks & Fusion 360
- **CNC Machining:** 3–8 axis milling and turning
- **Electronic Manufacturing Services:** PCB assembly & integration
- **Procurement:** Full traceability sourcing
- **Contract Manufacturing:** Scalable production
- **OEM Manufacturing:** Build-to-print assemblies and sub-systems
- **Testing & Inspection:** AS9100D, 5-axis CMM

Whether you're looking for a full turnkey, consignment, or transactional service, we're here to help.

CNC Capabilities: Up to 8-Axis Turning, 5-Axis Milling, and 5-Axis Coordinate Measuring

Rainhouse is one of Vancouver Island's leading precision manufacturers, delivering mission-critical components to national and global clients.

INDUSTRIES WE SERVE

AEROSPACE

DEFENCE (NAVY & ARMY)

FORESTRY

MARINE

MEDICAL

SCIENTIFIC

Flight-critical machining, tight-tolerance components, assemblies, and test support for national and global primes.

Precision components, electronic assemblies, sustainment support, and secure manufacturing for naval, aerospace, and land systems.

Durable machined components and assemblies for high-demand industrial environments.

Victoria-Class submarine support experience, structural components, racking, test equipment, and fleet sustainment manufacturing.

High-accuracy machining and assembly for diagnostic systems, instrumentation, and regulated devices.

R&D collaboration, prototype development, and advanced manufacturing for innovation-driven projects.

I was pleasantly surprised to learn of Rainhouse's expertise and capabilities. They were able to troubleshoot and repair some defence countermeasures components that are fitted onboard a Naval vessel. The cost was very reasonable and the turn around time was great. The customer service is top-notch. I'll definitely be looking to get more support from this service provider.
