BUILDING INDUSTRY CONNECTIONS AT DEFSEC WEST

This month, Rainhouse Manufacturing Canada Ltd. attended the Defence, Security & Aerospace Exhibition of Western Canada (DEFSEC West) in Calgary, where industry leaders, manufacturers, and innovators came together to connect and explore opportunities across Canada’s defence and security sectors. President Ray Brougham met with organizations from across the country, sharing capabilities, learning from others, and building relationships that support long-term collaboration.

DEFSEC West is a well-established regional event that brings together Canadian and international prime contractors, small and medium-sized enterprises, and government representatives to support participation in Canada’s defence industry. Through a combination of trade show exhibitions and structured business-to-business meetings, the event creates meaningful opportunities for companies to connect, collaborate, and explore new partnerships within the supply chain.
