
RAINHOUSE'S ROLE

Rainhouse Manufacturing Canada Ltd. is proud to support initiatives that strengthen our regional manufacturing community. Whether participating in industry events, supporting organizations such as VIMEA, hosting the Engineering Design Showcase, or collaborating with regional partners, we believe strong manufacturing starts with strong relationships.

As Canada's industrial priorities continue to evolve, collaboration will be essential to ensuring Vancouver Island is ready to meet future opportunities.

As opportunities continue to grow across Canada's marine, defence, and advanced manufacturing sectors, our region has an opportunity to demonstrate what can be achieved when a manufacturing ecosystem works together.

LOOKING AHEAD

Team Vancouver Island reflects a shared vision that Vancouver Island is stronger when industry, education, Indigenous partners, municipalities, and government work together toward common goals.

Because the future of manufacturing isn't built by one company.

It's built by an ecosystem.
